Daniel Rodríguez Torres
Computer engineer

"I am a Computer Engineer with experience in web development and I am seeking new challenges in my professional career. My professional stack focuses on developing web applications using Java (Spring Boot) on the backend and React.js on the frontend. I am an organized and ambitious person, with a strong desire to progress in this field. I consider myself capable of taking on high rigor tasks and I am willing to learn what is necessary to provide exceptional service."
