

Daniel Rodríguez Torres

Computer engineer

I am a computer engineer with experience in web development and I am seeking new changes in my professional career. My professional stack focuses on developing web applications using Java (Spring Boot) on the backend and React.js on the frontend. I am an organized and ambitious person, with a strong desire to progress in this field. I consider myself capable of taking on high rigor tasks and I am willing to learn what is necessary to provide exceptional service.
